Preparation for Filming:

Stage the house

Review all necessary lists (try to think of everything, we can even stage a Holiday)

Meet with the camera crew to discuss; lighting, positioning, focus, back ground noise, and possible retakes.

Please provide photos in any form; on cd, printed, or on a hard drive, of any family, friends, places, events, holidays, celebrations, pets, that may be prevalent and not available at the time of filming.

Filming schedule will be flexible; our goal is to have films to post production within one week of the first shoot. We will work with you and at your pace. We understand the sensitivity of families and children with special needs and are more than willing to become acclimated with the family prior to filming.
